

Forgotten Memory Stick Function

USB Type A style of memory loss. 1 GB = 1,000,000 bytes of memories lost to faded ability to recall visual cues in your grey matter not backed up to silicon chips for safekeeping. Not for minors or pets. Do not attempt to return memory.

1. Brightness Settings

Only one setting of little brightness.

2. Delayed Memory Retrieval

No longer forgetful placement once USB is located.

3. Dynamic Time Loss

Given time, everything will be lost to it.
