THE VELOCITY OF CASH MONEY

Let's say you get paid \$10 in **cash**, which you then use to buy lunch from a **street vendor**, who then uses it to **take a taxi** home, who then uses it to pay his **babysitter**, who then uses it to buy **groceries**, etc. *That single \$10 bill produced \$50 of economic value, and is great for the economy! **This is why you shouldn't give cash money to people who hoard it!***
