SUMMER FESTIVAL

2010

WHAT WHERE WHEN

*that's what's up*

**Hafiz: All the Hemispheres**

Leave the familiar for a while.  
Let your senses and bodies stretch out

Like a welcomed season  
Onto the meadows and shores and hills.

Open up to the Roof.  
Make a new water-mark on your excitement  
And love.

Like a blooming night flower,  
Bestow your vital fragrance of happiness  
And giving  
Upon our intimate assembly.

Change rooms in your mind for a day.

All the hemispheres in existence  
Lie beside an equator  
In your heart.

Greet Yourself  
In your thousand other forms  
As you mount the hidden tide and travel  
Back home.

All the hemispheres in heaven  
Are sitting around a fire  
Chatting

While stitching themselves together  
Into the Great Circle inside of  
You.

**Shakti Rhythm Vinyasa: Waves: Angela Boltz**

All energy (Shakti) moves in the same way, no matter what outer form it's expressing through—and this basic movement of energy in the Universe is a wave-like spiral flow. In this candlelight yoga class, we will move to the slow flow of ambient grooves, tribal beats, and traditional chants to awaken to the waves of prana that are coursing through the body. By relaxing our grip

on needing to control our movement and breathing—and surrendering the body and being to a sense of universal support—we actually open ourselves to "being moved and breathed" by the Universe. As we merge with the beat of the cosmic dance, we naturally shift into a state of Samatva: balance, peace, and intense self-awareness.

**Essensual Evolution: The Practice of Honesty: Joe Graff**

Description: The social world in which we live all too often revolves around complex networks and webs of deception and misrepresentation. Most people learn early in life that in order to gain social acceptance, one must represent one's feelings or experiences to others in a fashion that does not accurately reflect the truth of our realities and ourselves. Rather than accept the sensations, emotions, and feelings that our body provides us with, and communicate the truth of these experiences to others with integrity, we feel pressured to reject and withhold from others those experiences that do not fit into whatever social mold we learn early in life. We have all learned to offer to others that which we think is desired from us rather than that which is true within us.

This workshop is meant to playfully and lovingly challenge us all to rise above this pressure, and speak the truth of our experience without self-judgment. The structure of the workshop is organized into 3 games. The first game will offer participants quick prompts for simple, immediate expression (for example, "one physical sensation that I feel in my body right now is ..."). In the second, one volunteer at a time will sit on the "hot seat" and receive the full, loving, and curious attention of the gathering, and we will ask them the questions that it seems as if they would find joy in answering truthfully. In

the third, we will create a framework in which we can each safely reveal a present experience relevant to another member of the gathering.

This workshop is intended to be challenging and fun, and it is meant to provide each of us with a deeper understanding of the skills necessary to effectively communicate with those we love. In the interest of maintaining a concentrated focus, this workshop will have a cap of 15 participants. Please arrive early if you wish to take part.

**Shine Your Light, Baby! A Chakra Activating & Balancing Yoga Workshop: Liana Cameris**

A chakra is a wheel-like vortex of light energy and a point of connection between our physical and non-physical selves. It receives prana, the high-vibrational, divine life-force energy that enters us, transforms it to a lower frequency we can handle, and then externalizes this energy to our environment and to others. Each chakra has an optimal frequency that it spins at to be in balance. Our health and well-being depends on this energetic equilibrium. The ups & downs we experience in our lives can cause these vortexes to spin at higher or lower frequencies and become blocked or

closed, which affects how we feel, act and experience life.

Our energetic body is comprised of many chakras, but in this workshop, I'll check your seven main chakras to find out which are open, blocked or closed. You'll then participate in a journey of visualization, asana, pranayama and mantra to help you establish a healthy vibration in each chakra. At the end of the workshop, we'll do a second test which you can compare with the first. Accessible for most levels. Please arrive about 15 minutes early if possible. Caution: You may have new realizations, epiphanies, bursts of tears, giggles, etc.

The structure is made out of interlocking honeycombs, and each individual cell of the honeycomb is large enough to hold one seated person. They represent the literal and figurative "building up" of a city, a society, and a community.

## TRONNIS

by *Tracy Gillan*

Night-time LED tennis on the courts! Played by 2-4 people, each participant will have a light-up Tronnis Racket and light-up Tronnis Balls. The court and net will also be lit, replicating the look and the feel of the film Tron. Let the games begin!

## THE TEMPLE

by *leatrix*

The Temple aims to be a physical reminder and representation of the PEX vibe, built with the intention of anchoring that vibe. The design was directly inspired by the PEX Fest logo, focusing on the negative space of the forms to reflect an underlying attention to the ultimate unity of form/space, self/other and masculine/feminine. The Temple will burn on Sunday night in the spirit of offering all of the positive energy the festival built up over the weekend, to whoever/wherever needs it. Participants are encouraged to help "construct" this piece throughout the weekend using whatever materials they can get their hands on.

**TEMPLE OF TRUTH**

by Jen Upchurch, Chris Niederer, & Douglas Hart

Designed in the shape of a three-dimensional wooden eye facing the sky, the open-air Temple of Truth is intended as a place of exploration, contemplation, mourning, and personal expression. The curving design of the sculpture encourages visitors to walk through the heart of the eye, sit down at its center, and interact with the Temple's structure by leaving contributions of art, messages, and other ephemera on its wooden walls.

*This work is a recipient of the 2009 Oscar M. Ruebhausen Commission from the Greenwall Foundation. For more information about the project see [figmentemple.com](http://figmentemple.com)*

**THE GHOST PENGUIN ORACLE**

by Audrey Boguchwal & Chassy Cleland

IMAGINE: You are in the Antarctic seeking the sage advice of the Ghost Penguin. You are sitting on a block of ice, surrounded by cool snow, facing a small flickering fire. The

Aurora Australis (aka Southern Lights) may occasionally flicker around you. You're cold but happy because your small campfire is at the entrance of the small Ghost Penguin temple, a structure as ancient as the Oracle of Delphi. The sight of the Ghost Penguin shrouded in mist, glowing slightly beyond the temple gate warms you further, and you ask a question: "Ghost Penguin, will I recover the money I lost to a bunch of Nigerian scammers camped out in the back of a box truck?" You touch a mystic ice engraving, the Ghost Penguin grows brighter, and responds in an eerie voice "Signs point to no!" Further questioning reveals nothing more.

**ZARK'S HEAD**

by Quentin Davis

From the weird mind of the Great Quentini comes the second incarnation of Zark; Now it's growing a head. Zark's Head is an organic architectural space with a skylight during the day and a glowing bug head at night. See more at <http://quentini.com>

# THE TEN PRINCIPLES OF BURNING MAN\*

## **RADICAL INCLUSION**

Anyone may be a part of Burning Man. We welcome and respect the stranger. No prerequisites exist for participation in our community.

## **GIFTING**

Burning Man is devoted to acts of gift giving. The value of a gift is unconditional. Gifting does not contemplate a return or an exchange for something of equal value.

## **DECOMMODIFICATION**

In order to preserve the spirit of gifting, our community seeks to create social environments that are unmediated by commercial sponsorships, transactions, or advertising. We stand ready to protect our culture from such exploitation. We resist the substitution of consumption for participatory experience.

## **RADICAL SELF-RELIANCE**

Burning Man encourages the individual to discover, exercise and rely on his or her inner resources.

## **RADICAL SELF-EXPRESSION**

Radical self-expression arises from the unique gifts of the individual. No one other than the individual or a collaborating group can determine its content. It is offered as a gift to others. In this spirit, the giver should respect the rights and liberties of the recipient.

## **COMMUNAL EFFORT**

Our community values creative cooperation and collaboration. We strive to produce, promote and protect social networks, public spaces, works of art, and methods of communication that support such interaction.

## **CIVIC RESPONSIBILITY**

We value civil society. Community members who organize events should assume responsibility for public welfare and endeavor to communicate civic responsibilities to participants. They must also assume responsibility for conducting events in accordance with local, state and federal laws.

## **LEAVING NO TRACE**

Our community respects the environment. We are committed to leaving no physical trace of our activities wherever we gather. We clean up after ourselves and endeavor, whenever possible, to leave such places in a better state than when we found them.

## **PARTICIPATION**

Our community is committed to a radically participatory ethic. We believe that transformative change, whether in the individual or in society, can occur only through the medium of deeply personal participation. We achieve being through doing. Everyone is invited to work. Everyone is invited to play. We make the world real through actions that open the heart.

## **IMMEDIACY**

Immediate experience is, in many ways, the most important touchstone of value in our culture. We seek to overcome barriers that stand between us and a recognition of our inner selves, the reality of those around us, participation in society, and contact with a natural world exceeding human powers. No idea can substitute for this experience.
